

DOWTY *Turbocraft*

BRINGS THE JET AGE TO BOATING

Here it is... the latest and most exciting news in boating!

All over the world, boating enthusiasts are finding new fun, new thrills, new adventure with the jet-powered Turbocraft

Full speed ahead in as little as four inches of water—there's nothing under the hull to be damaged.

You're safe in the water near the Turbocraft—there's no propeller to cause injury.

Get behind the wheel. Touch the throttle. Feel the instant surge of jet power . . . the instant acceleration. Put the throttle down to the floor and make 180-degree turns in the boat's own length. Plane through as little as four inches of water . . . over logs and sand bars. There's nothing under the hull to be damaged.

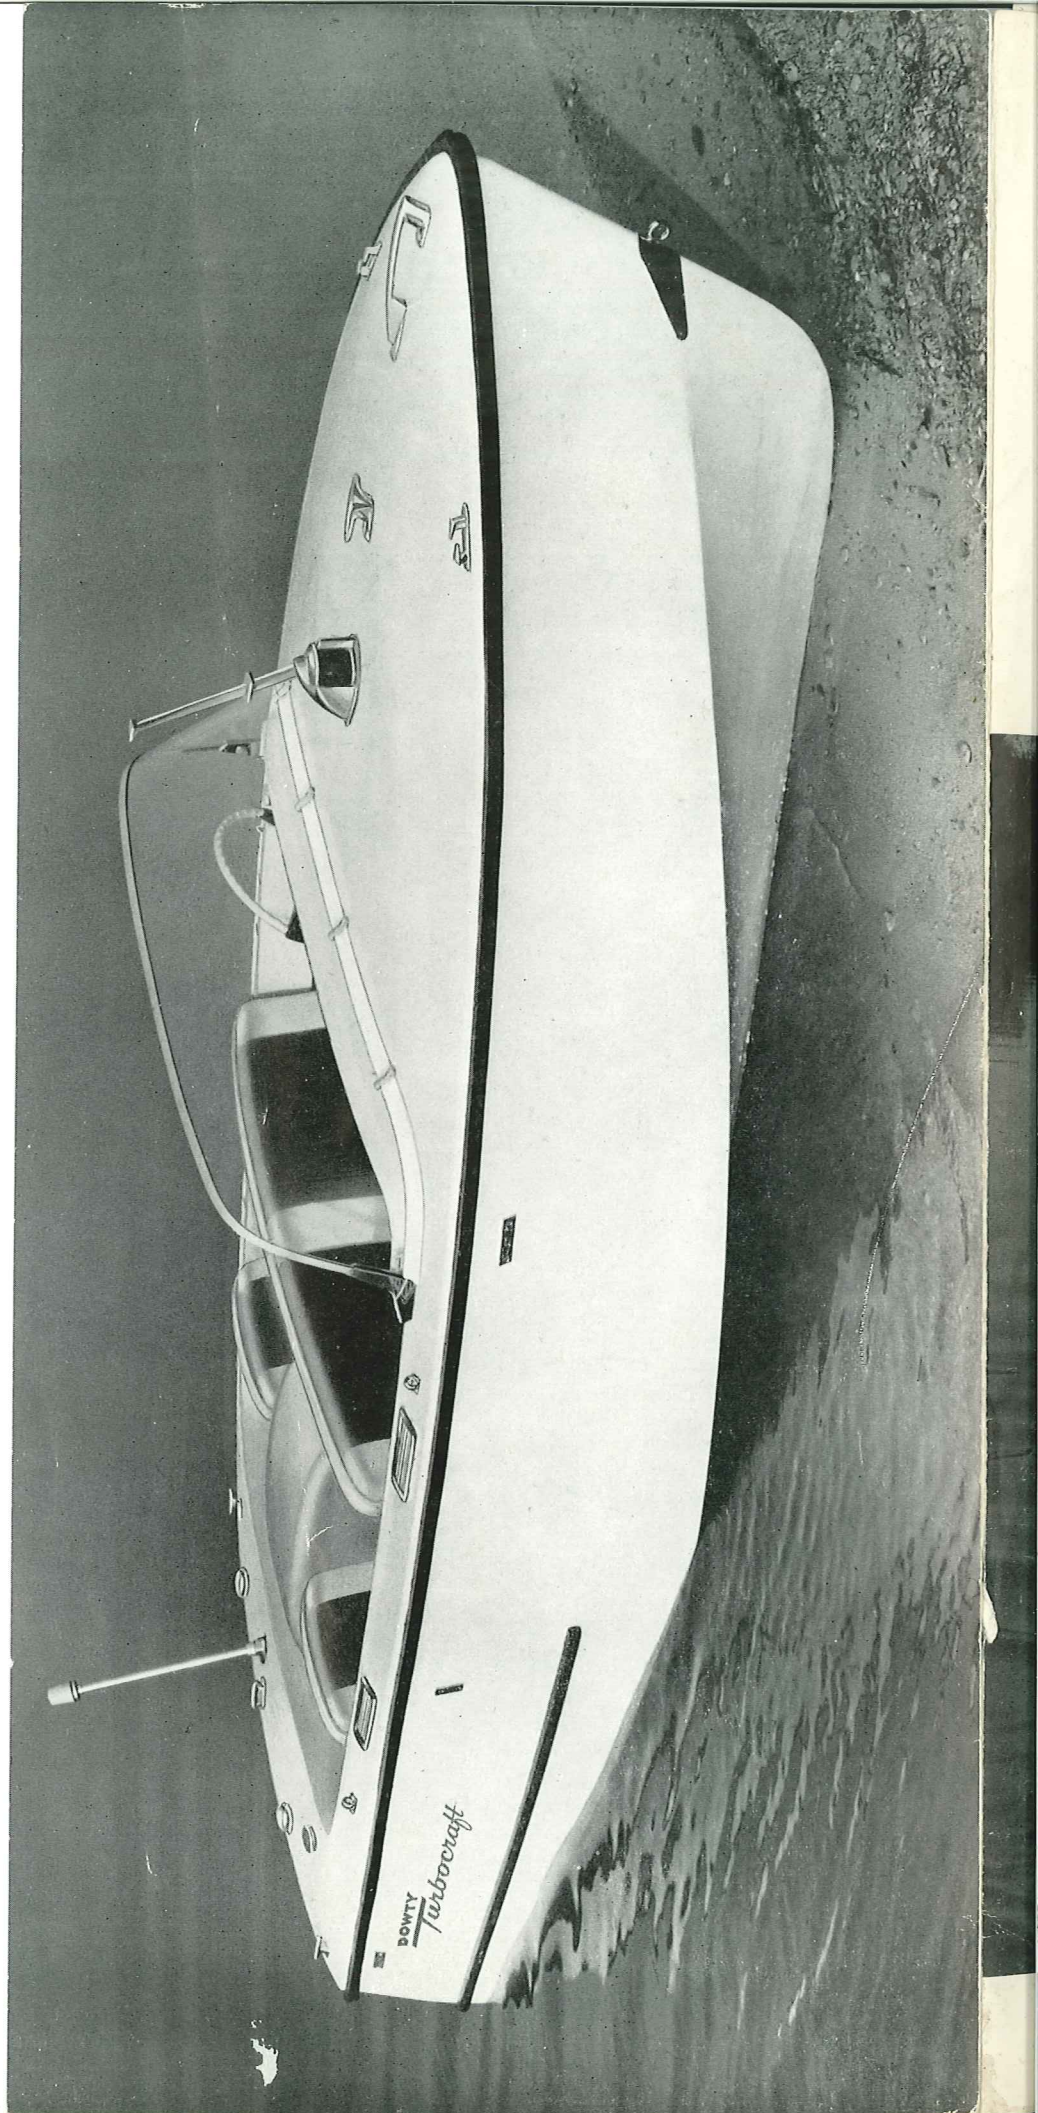

Now you know what the Dowty Turbocraft is like. This is the boat that has no propeller, no rudder. It's fast. It's fun. It's versatile.

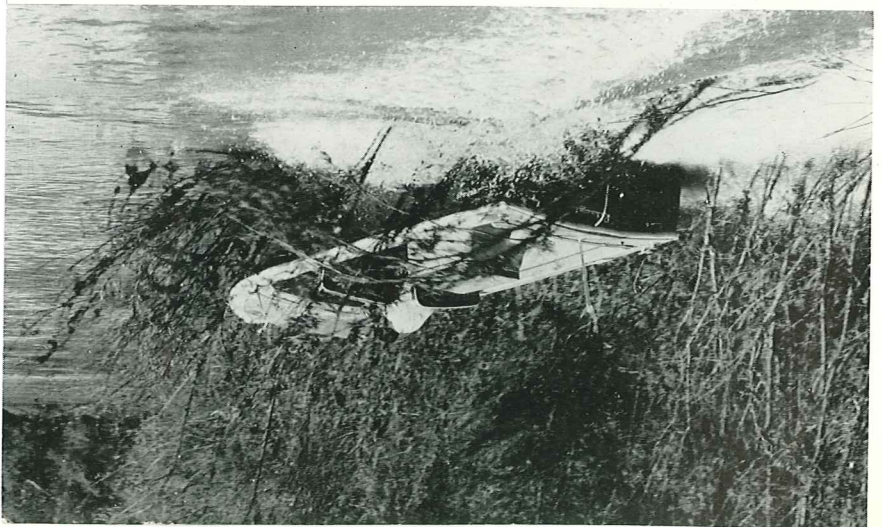

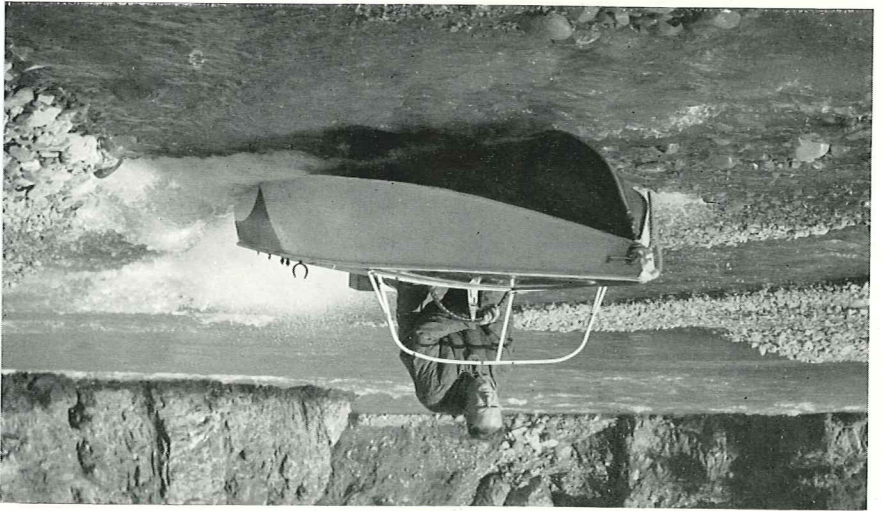

Write today for complete information on the sensational Dowty Turbocraft. Get the facts on the amazing jet-propelled boat that's the talk of boating fans everywhere.
